# ChemStore

This information sheet is provided for guidance only and represents a typical configuration from the Chemstore product range. Final specifications may vary depending on individual client requirements, site conditions, and bespoke design.

## Intended Use

Safe storage and containment of Peracetic Acid (PAA) and other hazardous reprocessing chemicals in healthcare and clinical environments.

## Typical Applications

- Endoscopy departments
- Sterile services departments
- Operating theatre suites
- Pharmacies
- Hospital and clinic store rooms
- Private healthcare facilities

## Construction & Materials

- High chemical-resistance construction
- Corrosion-proof and rust-free materials
- Resistant to solvent attack
- Withstands mechanical and thermal shock

# ChemStore

## Storage & Containment

- Perforated / ventilated shelving to direct spills
- Fully bunded floor to retain chemical leaks
- Removable spill tray for safe clean-up
- Optional two-part cabinet for separation of Chemicals A & B

## Filtration & Ventilation

- High-capacity chemical-specific primary filters
- Secondary safety carbon filter for continued safe operation
- High-capacity internal fan
- No requirement for external ventilation

## Safety Features

- Visual and audible alarms
- Spill alarm with automatic door lock
- Door interlock to prevent opening during alarm conditions
- Door-open alarm (reset by closing door)
- Alerts staff to don appropriate PPE before intervention

## Security

3-point door locking system

## Dimensions (Standard Unit)

- **Height:** 1800 mm
- **Width:** 950 mm
- **Depth:** 450 mm
- (Custom sizes available on request)

## Installation

- Freestanding unit
- Adjustable anti-bacterial feet
- Custom fabricated to suit available space
