NeuVend SI Lined Flexible Hose

This information sheet is provided for guidance only and represents a typical configuration for across the range. Final specifications may vary depending on individual client requirements, site conditions, and bespoke design.

Intended Use

NeuVend SI™ Lined Flexible Tap Tails - Stainless Steel Overbraided with Biomaster Antimicrobial Protection.

Connection of taps and fittings to hot and cold potable water supplies in environments requiring enhanced hygiene and infection control.

Typical Applications

- Hospitals and healthcare facilities
- Dental clinics
- Nursing and care homes
- HVAC systems
- Aviation and leisure facilities
- Any potable water system with infrequent use or elevated temperature

Construction

- NeuVend SI™ liner manufactured from polyolefin-based materials
- Smooth polyethylene internal surface
- Integrated Biomaster Antimicrobial Protection
- Stainless steel overbraided outer layer
- Fixed end fittings to customer specification

NeuVend SI Lined Flexible Hose

Antimicrobial Protection

- Biomaster silver-ion antimicrobial additive integrated into the liner
- Dispersed throughout the polymer and will not wash off
- Proven to inhibit growth of harmful bacteria
- Especially effective in warm, low-use water systems

Microbiological Performance

- Independently tested with proven effectiveness against:
 - Legionella
 - Pseudomonas
 - MRSA
 - E. coli
- Reduces bacterial growth and biofilm formation within the hose
